

I bought XM radio due to the lack of quality on regular radio. Now I finally have a choice as to what I want to listen to. The traffic & weather reports are great for when I'm traveling. I just flip to the local station and I know what to expect once I get there.

This is something I choose to pay for. Therefore, I don't feel that anyone has the right to take this service away. Please reject NAB's petition 04-160.
